

Commitment of quality

With this statement, the Quality Assurance Commission of the Master's degree in Marine Ecology of the UIB wants to express its commitment to the continuous improvement of the program, as it could not be otherwise, and therefore commits to:

- a) Keep abreast of scientific knowledge that are available internationally and maintain a commitment through teaching, to transmit and explain the most up-to-date knowledge on the subject.
- b) To use the most appropriate and updated teaching methodologies for scientific and technical training in the field (marine environment), as well as in the laboratories and classrooms.
- c) To maintain and promote the marine cultural tradition of the Balearic Islands and to share this to the newcomers.
- d) Provide all the information on the master program in public, with transparency and assuming the obligation of accountability.
- e) Develop our activity in accordance with the principles of legality and legal security and under the criteria and principles of quality of the university.
- f) To welcome students and teachers with utmost respect and warmth within the work and educational environment of the university to achieve knowledge, wisdom and sense of universality.

Dr. Antoni Martínez Taberner, director of the Máster's degree in Marine Ecology of the UIB.
